

Hygge Woven Heart Ornament Pattern:

Materials:

- 2 -- 10 by 3.5 inch pieces of contrasting paper, folded in half
- Scissors
- Glue stick

Directions:

Cut out the woven heart ornament pattern template below.

Prepare 2 pieces of contrasting paper by folding them in half, with one piece of paper inside the other with wrong sides together. The colored side should be up.

Draw the heart pattern on the paper using the template. Cut out both pieces of paper together, cutting around the pattern lines to cut out the shape.

Holding the two folded pieces of cut out paper firmly, cut along the dotted cutting lines to create the weaving strips. You can vary the thickness of the strips.

Weave the two halves of the heart together, by alternating the weaving for each strip either inside the next one or outside the next one.

Finish the basket with a strip of the same paper glued on front and back to the center of the heart to create the basket handle.

Other Materials:

- Glossy magazine pages
- Calendar pages
- Wall Paper
- Felt
- Stiffened Fabric
